In every election everywhere this picking and electing of "best men" goes on, and the aelection is done under the progress which Socialism has made in Europe, however, it is Americalism to be unkered in first. The old parties are forever electing "best men." They assure the voter of that fact at every election.

And many a voter swallows the

bait and is caught.

Great numbers of these best men have been elected yeas after year, men of business standing and men who have fairly good reputations so far as modern citizenship goes. Yet legislation always favors the enemies of the people, either outright or hy the people, either outright or hy means of bills with jokers in them. . In an investigation in New York

sands of doll is were spent at every election for the nomination and election of men who would serve the railroad corporations." All elections are slike, and the treet railway or traction interests are not the only ones who put money

into elections, by any means.

The voter in the old parties is absolutely approtected. He cannot know what is going on under the surface. One year his favorite politicians may be regular, or another year they may line up as reformers—the old parties always stand under the necessity of forming themselves-but in whatever guise they appear, the party manage to protect about the same genera interests, with the poor voter con-tinuing to hope against hope.

The Social-Democrats do not pre sent "best men" but best principles As against the onward march of Soeialism the interests stand no show at all. Even the joker game cannot be worked, for the Social-Democrats draw up their own measures.

not stop this particular politician, or someone serving his interests. About And Do It Much Better

Now his further fate depends upon his neighbors, who will figure as witnesses in the approaching trial. And it is not yet certain

whether they will pronounce him guilty.
Dietz has requested our Mayor Seidel to secure as his counsel the famous lawyer, Clarence Darrow, and Seidel immediately complied with his request. It is announced that Mr. Darrow has agreed to defend John

Besides there are many people in Milwaukee-Socialists as well as others-who have pledged themselves to support the brave old fighter financially, as did the workingmen in the case of Moyer and Haywood.

Of course, Dietz is a law breaker. He dared to resist the power of the law-gun in hand.

But on the boundary of civilization, and in the northern part of our state Wisconsin, things are done otherwise than in the "effete" East., If Dietz had depended on the law, the lumber trust would have secured a free route through his property, would have furnished a bond and dragged out the case for half a century in the courts.

As it was, Dietz remained in possession of his property. And if it had not been for the unfortunate mix-up with the schooldirector, in which Dietz forfeited the sympathies of his neighbors, he probably would atill be holding the fort.

The man who risks his life for the "right" or that which he conceives to be the "right," will always easite sympathy. But there he must stop. In a Republic where judges and prosecuting attorneys are elected by the people, and where the citizen has the right to serve on juries, legal protection is secured, at least theoretically, and armed self defense loses its justifica-

However, the machinery of the courts, as Roosevelt himself admits, has suffered such a loss of prestige, through the corrupting influence of capitalism, that it can be derided and defied at pleasure.

But the reaction has set in. The spirit of justice is heginning to stir among the people and capitalism cannot ride rough shod over the masses much longer. Legislative restraints are being applied, and many laws and legal proceedings are now employed against it. Little may come of this, but at any rate it is something that the trust kings can no longer have their way in every thing.

The sense of justice is growing among the people and is crystalizing in the form of laws. Whenever the conviction gains ground among the masses that this or the other institution is unjust, this conviction finds expression in the legislative bodies and leads to the abolition of that in-

Injustice exists only through the patience of the masses. If all the people would at and for their rights as energetically as Dietz stood for his. conditions would change very quickly.

For this guns are not needed. Bellots will do it—and do it better.

If the Social-Democratic party have had a stronger representation in the lagislature of the state of Wisconsin in 1907, when we introduced a bill for the purpose of appointing a committee to investigate the Dietz claim. the matter would have been settled satisfactorily a long time ago.

Therafore I say again: The way to resist this trust rule is not for a lone farmer in the backwoods to defy the power of the entire state a shot gun. That method can not win. The way to resist is by rolling up 200,000 votes for the Social-Demo-

cratic ticket this fall. That will settle the despotism of the lumber trust and of a icw other trusts in this state at?

The CLASS STRUGGLE played the same important role in the advancement of civilization in the human race as the STRUGGLE for existence of the INDIVIDUAL beings played in the development of the

ganic world. CLASS STRUGGLE in words means WAR BETWEEN VARIOUS GROUPS The STRUG-GLE FOR EXISTENCE means WAR BETWEEN INDIVIDUALS. Nature endowed each individual with an irresistable will to live. In order to fulfill this inexorable law, each being must struggle to obtain all the necessary means to live.

In primitive times the means of existence were scarce. Yet each indi vidual, in obedience to nature, had the

What an opportunity for the So-cial-Democrats! Let the Milwaukee comrades put Berger and Gaylord in-to the congress,—and the beaten curs there (I use the word in a political sense only) who have heretofore licked the hand of the system, and will now fawn upon the new master -the people will pass the Social-Democratic bills as fast as the roll can be called.

Suppose our first great measure, an act to take over at once—the rail-roads and the telegraph, is put into the next congress, and pressed for passage by Berger and Gaylord. Whatever they think, or do not think -about it—the working majority of the congress, now that they have had the fear of the people driven into them—will make the bill a law. They will never wait to hear the roar from the farmers—or the railroad employor the labor unions. Every man of them will have but one rule of action to get right with the people, and to do it now.

That Will Make Socialists and Socialist Votes

Many of you are looking for books and pamphlets to give to

Here is a list we can recommend to do the "Socialism Made Plain," by Allen Benson, is by all odds the hest book to put in the hands of the man you are trying to land. This book is written in everyday language by a newspaper man. It should be circulated extensively he-

by a newspaper mau. It should be circulated extensively no now and election. Single copies, 15 cents; 25 copies, \$2.75; 50 copies, \$5; 100 copies, \$9. "The Constructive Program of Socialism," by Carl D. Thompson, is another book which will work wonders in removing prejudice. It shows what Socialists in European countries and Wisconzin have accomplished and planned for improving the conditions of the workers while in the minority in the city councils and state and national legislatures. If you have a doubting Thomas in your circle who is inclined to be an impossibilist, just get him to read the Constructive Program of Socialism and watch the results. Single copies, 15 cents; 25 copies, \$2.75; 50 copies, \$5; 700 copies, \$8.

"My Objections to Socialism," by u leading business man. It takes the enemy of Socialism off his guard and gets in its work so effectively before he realizes it that he seldom recovers.

In one big Milwaukee industrial plant a superintendent gave a Socialist permission to pass the leasest around to the men, saying: "That's what we want—something to show up the fallacies of Socialism." It did its work before the superinterdent realized what had happened. One hundred copies by mail, 17, cents; 1,000 copies by express, 75 cents, express charges extra.

"What The Republicans and Demografs Have Done for The Working Men, "Their full record on that score put in the smallest possible space. None so dumb but what they can understand it. No one but will-read every word in it. One hundred copies, 25 cents; 1.000 copies, \$2. Don's fail to get a lot of these to hand around.

fill Grisis." by Robert Hunter. Just published, is the most important pamphlet from a labor union and Socialist point of view that has appeared for years. It deals with the nsurpation of power by the courts in the United States. After you have read the book you can come to no other conclusion but that the workers of America, union men included, must choose between working class political action and judicial despotism controlled by a plutocratic oligarchy. Price, 10 cents.

"Mayor Soldel's Inauguration Speech," is measured as a propaganda document to be used where there is a municipal contest on. It points the only way to municipal solvation from the corruption where now walsts is all our cities, whether ruled by Democrats or Republicans. Price, as cents per too; 500 for \$1; 1,000 for \$1.75

The popular misconception regardaristocracy of brains was born out of the monopoly of privilege. It is a false notion that the working-man is not possessed of the same amount of mental eapacity as the eapitalist. It is also a false notion that the cultured rich are always superior in mental power to the hard-

working poor,

The foregoing conclusions are ar rived at from the point of view of science, and it is the writer's purpose to prove, if anything that the industo prove, if anything, that the indus-trious poor have better claims to meatal distinction than the exploiting rich. I further say, without fear of contradiction, that the best thinking and the greatest and noblest achievements of the present day, and of centuries past may be credited to the working class and those who have viewed life from the point of view of the proletariat.

Deserved Sareastic Thrust

Finley P. Dunne in his "Mr. Doo-ley" expresses a popular helief of the workingman's mental worth of himself when he says:

"Wor-r-kers av th' Wor-r-uld, yez ar-r-e a a fr-r-ight. Yez hov nawthin' t' luze but yer brains-and yez hav-

en't any."
But Mr. Doolcy's sareastic version of the personation of the "Communist Manifesto" is not true. Scientific investigation demonstrates that the investigation demonstrates that the children of the most highly civilized parents if deprived of advantages for mental development would degenerate in the jungle to helpless savages. And if the off-spring of illiterate working people were provided with proper educational advantages in a culture environment—such a child would develop high mental would develop high mental

Lester F. Ward, professor of sociology of Brown university, who would be the greatest philosopher of the twentleth eentury if he could become clear enough in his economics to rec-ognize that the worker is entitled to "Applied Sociology" has this to say about the oligarchy of intelligence:

"The proposition that the lower

classes of society are the intellectual equals of the upper classes will probably shock most minds. At least it will be rejected almost unanimously as altogether lalse. Yet, I do not hesitate to maintain and defend it as an abstract proposition. But of course we must understand what is meant by intellectual equality. I have taken some pains to show that the differ-ence in the intelligence of the two classes is immense. What I insist upon is that this difference in intelligence is NOT DUE TO ANY DIF-FERENCE IN INTELLECT. It is due entirely to DIFFERENCE IN MENTAL EQUIPMENT. It is chiefly due to difference in knowledge, if we include in knowledge a familiarity with the tools of the mind and acquired ability to utilize the products of human achievement.

Environment Does It-ENVIRONMENT TRANSFORMS THE ANIMAL WHILE MAN TRANSFORMS THE ENVIRON-MENT, but in the transformed en-vironment the mind of man, rich and poor, develops to a point of equal equipment, with the advantage on the side of the man who is not hampered by poverty or riehes. So it is clear to students of socio-

logy and political economy that the eapitalist, the wealthy and the aristo-erats have no valid claims to the distinction of superior brains, and it is a grievous error for the workingman to foster the belief that he is inferior

Knowledge Not Inherited
Further proof of the error of the popular misconception regarding brains is shown by Dr. Ward, when he says: "Social heredity is not a process of ofganic transmission; no part of the Social germ-plasm passes from one individual to another, hut ALL KNOWLEDGE MUST BE SEPARATELY ACQUIRED BY EVERY INDIVIDUAL. The social organization must be such as to in-fuse it into the members of society as fast as they are capable of re-ceiving it. This infusion of it is social transmission and unless it is infused it is not transmitted. The only way in which products of past achievement bave been preserved has been through such a degree of social organization as is sufficient to infuse them into a certain number of the members of society." Provide Education for Others

Right here I want to say that my ather, who was a brick molder, never had an opportunity to go to school a day in his life, and my mother could scarcely write her own name. My parents were boru in an environment of wage slavery and social injustice, and were brutally deprived of even the elementary advantages the world afforded in their days of early exist-ence. My father made bricks for universities, but never saw the inside of a ward school. He had brains though id when his work-racked body was id away in a little cemetery in Illinois, it is my firm conviction that undeveloped genius was buried be-neath the sod. As proof of this statement I'll record the words he said to me when he sent me to college to en-

joy the luxury of higher education:
"My boy, never forget when you are in that university that it was built by the hands of workingmen. Also remember that the working class provides the professors and students with food and clothing, and the same class also prints and binds the books from also prints and binds the books from which you will improve your education. Also remember that your father made bricks together with thousands of other workers for the building of universities which none of us ever even got a chance to look at."

Tragedy of Labor

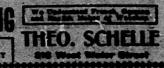

There is an illustration of the tragedy of the working class. Millions upon millions of the industrious PROVIDE ALL THE MEANS of higher education and 2re deprived of even elementary instruction.

Undeveloped genine? Yes, and we are burying more and more of it every day. And if permitted to live such a life as the Socialist state would insure they unquestionably would have enriched the earth far beyond our enriched the earth far beyond our dreams. And when my father said to me that perhaps I would be able to learn in a university why the great mass of workers were intellectually disinherited, by the sentence of a vicious system, he was wrong. I didn't learn the remedy there. The economic nonsense taught there I had to discard. I searned of the canse of

Whether we approve or disapprove of votes for women, the fact is that women are beginning to take a lively interest in political affairs. They are coming to see the relation of the home and the welfare of the child to municipal and national affairs. They are beginning to be weary of obeying laws they have had no part in framing, and submitting to institution they had no share in establishing.

"I expect to introduce into municipal affairs the woman's point of view which, added to the mail's; makes the perfect point of view. If the world needed but one point of view, why were the minds of men and women made so radically different? made so radically different? Here-tofore we have had things run as they must necessarily be from a one-sided outlook. You know how. We shall never have a satisfactory government until we have both the masculine am feminine minds represented."

If this experiment is a success woman's squad is a possibility. Matters which relate to health of mind or body, inspection of places of amuse ment are affairs which well might be given into the hands of women. manufacturers. He said the city made an extra charge for the water and it brought in \$200,000 a year,

Ald Berger and the Socialists sup-ported the Wright resolution. Ald. Berger reminded Ald. Corcoran that would clear vastly more than \$200,ooo. The Socialists wanted the out-skirts to come into the city. If there were no city here they could not get such water on any terms. We did not just want them to have our water at an advance. We wanted them to come in and help pay for our schools, our city departments, our streets and so on. The hig factories went out-side the city to escape taxes and still have city benefits without paying for them.

The resolution was passed, 34 to t and the one lone vote was Ald. Corcoran's.

Later in the session Ald. Corcoran tried to even things up. Ald. Berger had prepared a resolution fixing \$2 a day as the minimum wage of all eity laborers, but had given out copies of it to the newspaper men. Ald. Cor-coran's desk is near the reporters' table, and it would be easy for him to learn what the resolutions were. At any rate, when it was time to introduce resolutions, he handed in a resolution to give the laborers \$2 a day. It began with a whereas about the cost of living the same as Berger's and was looked on by the Socialists as a disreputable steal. He had the advantage, as the ward aldermen's names come first on the roll. Ald. Berger was indignant.

"It is very nice of Mr. Corcoran to steal my resolution from the press table and hand it in," he said.

This brought Ald. Corcoran to his feet without ceremony.

"Do you mean to say that I took your resolution and handed it in?" he demanded.

"Yes, I do. You took it and copied it before I could get mine in."

the reply. . "That is a lie," was the response.

The Principal Reason Why

I wish each Herald reader could spend a couple of days with the editor of the Builders' column and read the letters which are coming from north, south, east and west. They are from all kinds of people in every station of life, but they all breathe the same spirit of inquiry, aggressiveness and hope.

They want the Social-Democratic Herald, and give the reason why.
They "WANT TO WATCH THE PROGRESS OF THE FIRST

Electric Traction Development Difficulties in Milwaukee

Electric traction in Milwaukee was hampered and retarded by many difficulties in its introduction and

Complicated mechanical problems taxed the skill and ingenuity of the best engineers.

Financial requirements involving unforeseen demands for large suma of money seemed almost insur-

Small single truck ears with side seats were found insdequate and were replaced by large double truck ears with cross seats doubling the seating capacity of the small cars. The electric equipment of two motors of 15 horse power each was replaced with four motors of 50 horse power each.

The increased size and weight of the ears necessitated new track construction. Flat rail weighing 45 pounds per yard laid on wooden stringers was replaced by girder rail weighing 58 pounds per yard aupported on iron ehairs, the girder rail in turn being superseded by T rail 7 inches high weighing 97 pounds per yard The same of the same

The original installation of iron poles placed in the center of the street supporting No. 4 phosphor bronze trolley wire weighing 667 pounds per mile gave place to more substantial polea installed on each side of the street supporting 4/o hard drawn copper trolley wire weighing 3381 pounds per mile.

These changes were made necessary because the large ears required more space between tracks and an increased amount of power for their operation, necessitating heavier overhead trolley construction.

The power facilities were found to be inadequate to meet the increased demands for power. The original installation of boilers, engines and generators was

shortly replaced by larger units of much greater capacity and more modern design. So rapid was the development of the art in this particular, that certain types of power plant apparatus became obsolete almost before they were ready for operation.

Besides these mechanical problems, other difficulties were encountered.

Labor skilled in the construction and operation of electric railways was scarce and difficult to obtain. The cost of maintaining tracks, cars and power plants was very great. Operation of the cars was at best uncertain. Passengers had no assurance of reaching their destination on anything like schedule time.

The financial problems of early electric railway cou struction were fully as great as the mechanical problems. The cost of the construction and equipment of electric railways was from five to ten times more than horse railways. Because of the difficulties met with and the uncertainty as to the results it was hard to interest capital in their development.

The investment in the horse-car lines was sacrificed when electricity was adopted. Owing to the construction and equipment of electric lines in their first stages of development being inadequate, it became neeessary to reconstruct and re-equip them in order to provide reliable and adequate service,

Capital was obliged to carry the burden of at least two and in some cases three investments in one electric railway property. Operating revenues were found to be inadequate to provide for operating expenses, reconstruction expenditures and depreciation.

These conditions deprived capital of return on its

International Union of Elevator Con

structors
Elevator constructors have been greatly beuchted by banding them-selves together and forming labor unions. Prior to nine years ago only six unions of this craft were organ ized, each defending labor's apart. In 1901 representatives from these unions met at Pittsburg and formed a national union. They then found that the majority of their mem-bers were working sixty hours per week at an average wage of \$16 per week, and time and one-quarter and time and one-half for overtime. As-time rolled past, each year stowed an increase of mions, and demands were made for increased rates of wages and shorter working hours with other int-proved conditions And now as an international union, they have organ but the union officers are consident ized locals in the United States and that these men will soon return to Canada numbering twenty-une unions. Their propress has been sure and steady, and they can now say and steady, and they can now say that their trade is a jo per cent union, with an average increased rate of wages of \$8 per week, and working hours reduced from 50 and 54 hours per week to 44 and 48 hours with double time and time and one half for alt overtime, and six legal hold days and Labor day. The union regulation is that no alexance was not required to the control of the union coal miners of Spring-hill, whose fathers have been nut on strike for fourteen months, left the for alt overtime, and six legal hold days and Labor day. At the end of that time the men had assurances that they would not be asked to work afternoon off. The outside carpenters have gained an increase in wages Hamburg, Germany-An agreement

has been reached between the em-ployers and the shipbuilders, who have been on strike for two mouths. thus averting the threatened lockout of the metal workers. The shipbuilders will get an increase in wages equivalent to 4 or 5 cents a day and a reduction in working hours to lifty-five hours a week in Hamburg and fifty-six in other towns. The agreement will go into effect Jan. 1, 1911. Mew York, N. Y .- When the Guitar and Mandolin workers threatened to strike recently the bosses ignored the threat, but immediately after the strike was ealted five manufacturers signed the agreement with the union and forty-three men returned to work victorious. The men will get an increase in wages of 20 per eent, ree-ognition of the ution, and a ten-hour day, with a half hour for lunch. There are still sixtyseven men ont on strike, but the union officers are consident work, as the tip men who work in the trade are all organized, and scalis are not to be had.

Halifax, Nova Scotia-The children strike for fourteen months, left the schoolroom in a body on the opening day because they were asked to sit beside strikebreakers' children. The teachers were helpless, for the union miners' children were in the large majority, and could not be persuaded to come back. Given the suaded to come back. Given the choice between teaching a handful of strikers' children or telling them to slay at home and let the old scholars fill the empty seats, the teachers gave in and the Springhilt school is now union shop.

Chicago, Ill.-Local No. 769. International Brotherhood of Teamsters, recently signed a new wage agreement to run from Sept. 5, 1910, to Aug. 19, 1911, whereby the experi-enced men are benefited by an increase in wages of \$5 per which now makes their wages \$90

Mrs. Rorer says:

"There is no reason why you should not cook with gas the year round."

The world's greatest cook says:

"If your kitchen is not heated by your furnace or boiler you can make it livable by the use of a coke attachment on a gas range. At the same time you can use the most convenient fuel obtainable—gas.

"The kitchen heater attached to the gas range above will burn any kind of chesp coal, wood, coke, sweepings, rubbish, paper and even garbage.

"It furnishes the cheapest heat obtainable. In emergencies the two holes on top can be used for cooking, or beating water.

"The combination of this heater with a gas range gives you an ideal heating and cooking outfit for the year around-winter as well as summer.

This combination will take up much less room, is much more economical and convenient and much cleaner than a coal range. It can be attached to any gas range."

4. Is it not a fact that Catherine Heisdorf is a notorious woman? 5. Is it not a fact that she has a police record, and that her companion was fined \$22.50?

6. Is it not a fact that she h. s accused half-a-dozen prominent men of this town of bastardy? 7. Is it not a fact that she went to innumerable physicians this year

and asked them to commit abortion? 8. Is it note fact that she spent two months in the insane asylum, and

is regarded as a nymphomaniac or sexual degenerate? 9. Why did not the district attorney's office take up in this public way

any of the other 300 basterdy cases this year? 10. Why was the Rucker case never brought to trial?

11. Is it not a fact that the story of the abortion is a fake, and that all of the physicians present at that examination (Dr. Beffel included) agreed that there was no tangible evidence of pregnancy? 12. Is not the story that Dr. Rucker offered money or marriage a lie?

13. Did not Mr. McGee say to Victor L. Berger that he would give \$1,000 not to have touched the ease? 14. Can Mr. McGee give an instance of any other case in this coun-

try where such a contemptible pack of lies was read into the record when a case was diamissed? And is this procedure legal? Is any decent man or woman safe in Milwaukee as long as a black-

guard and character assassin like McGee is diatrict ttorney? 16. Can any decent man aay after all this that McGee is the proper

By the way, Mr. McGee, what has Candidate Cochems' attack upon the come of your ilear Katie?

McGee says he stands on his rec-

ord. Not all of it, we guess! How neatly the papers twisted the applicase at Thursday night's meeting!

Maybe you do not believe that the old parties are desperate this fall! Candidate Cochems' attempt at a

the Heisdorf woman, out of town Whar was he afraid of? Milwaukee county does not main tain a district attorney for the purpose of SUPPRESSING EVIDENCE and framing up dirty deals. The present incumbent is a noxious misfit."

Those citizens who were present at Monday's council meeting had a live-ly time. It ought to inspire more people to go and see their aldermen at work. Nothing tame about a good, regulation conneil meeting, we assure

McGee, when he proclaimed himself the protector of womanhood the other night, might at least have explained why he had the police run Catherine Heisdorf out of town after he had used her for his own low political purposes!

that "locally the Socialists propose number of the progressive policies, when it is noted that the party Republicans are still blinking at the UNBLUSHING STEALS made by Factory Inspector Valuer says the chools should pay more attention to teaching the children the English language. They charge that he has alienated from the party all the decent citizens who ordinarily vote the ticket.

His efforts to hide his feelings and to brass it out makes a sad spectacle for decent Milwaukee to gaze upou.

The speech of the small politician who holds down the district attor-ney's job, at the West Side Turn hall ney's job, at the West Side Turn hall Thursday night, proclaimed him one of the worst 'political demagogues who has ever dared to face a Milwaukee audience.
